

California Solar Initiative Program Non-Residential Energy Efficiency Disclosure Agreement

By installing all cost effective energy efficiency measures and having the building retro-commissioned before installing a solar energy system, the owner/operator/manager can lower the overall system size and cost.

The Host Customer must sign and date this form once completed. Electronically attach this form and a copy of the energy audit and benchmark rating, if required, with your California Solar Initiative reservation application in PowerClerk.

Please select your Program Administrator

☐ **SCE** ☐ **PG&E** ☐ **CCSE**

Fill in the blanks.

I am the owner/operator/manager (**circle one**) of the commercial building located at: _____
(address, city, state, zip code) and I am applying for incentives for the PV system to be installed on this building.

I have reviewed the building's available 12 months of energy usage from my utility company.
(Contact your Program Administrator if you need assistance)

I used at least one of the following services or tools to learn about energy efficiency measures that could be installed at my business:

Utility Link

- ☐ <http://www.pge.com/mybusiness/energysavingsrebates>
☐ <http://www.sdge.com/business/rebatesincentives/>
☐ <http://www.sce.com/business/ems/default.htm>

Third Party Link
